DISCOVERING
THE WORLD
THROUGH PLAY

GLOBAL

Over a period of 60 years the Richter family has turned what was once a small workshop in an old forge into an internationally active and globally respected manufacturer of play equipment. We are proud of the fact that children of all ages on all continents have the opportunity to climb, slide, swing and play on Richter play equipment – and simply have fun playing.

DIVERSITY

We not only design and manufacture unique play equipment, we also provide consultation to help you create small and large play areas. Every piece of play equipment made by Richter is unique and hand-made in our workshop in Frasdorf, Germany. We deliberately avoid using industrial manufacturing processes to retain the highest degree of self-determination possible. We understand the needs of children of all ages as well as those of older people and people with special needs. Our goal is play in diversity and together.

PLAY VALUE

One of the most important principles at Richter is to provide “as much play value as possible, as much safety as necessary”. We create and build play equipment based on a child’s perspective, rather than style and design. Only play equipment with a high play value will show signs of wear and tear on playgrounds later on. That’s the best proof of a high play value – and that we understand how children want to play.
