

Special towers and platforms

Richter Spielgeräte GmbH

The **original**, for more than 40 years!

Play value

The nicely shaped, large Hexagonal Platform is a particularly good centrepiece for a play area. The appealing material and the harmonious design make it perfect for climbing, playing hide and seek or simply to have a chat. The platform can be combined with many attachment elements. All levels can be reached by ladders.

Design: P. Hohenauer

3.28700 Large Hexagonal Platform with Roof
 total height 5.40 m
 floor height 0.50/2.00/3.00 m

Play value

The attractive shape of the complex Hexagonal Tower, including a lockable equipment room, is particularly suited as an identification element in a play area. It has a very special appeal and is often the centrepiece of a playground. It can be integrated into adventure games and role playing. A bench in the bottom room is an inviting place to meet for a chat.

Design: P. Hohenauer

3.20900 Hexagonal Tower
with lockable equipment room
total height 4.30 m
floor height 1.25/2.20 m

Climbing up the ladder to the next highest room is also very exciting.

This tower is particularly suitable for small outdoor spaces which call for a special space concept.

Play value

The Castle Tower looks just like an old fortified tower and is a meeting point for older children and young people. It is crowned with a battlement and can be combined with other equipment. It can be combined particularly well with slides but other combinations are also possible. A ladder leads up to a two-metre-high floor, topped with a castle flag. A round bench in the lower area is an inviting place to sit for a while. With its striking appearance, the Castle Tower has a signal effect and lends a special atmosphere to every playground.

This picture shows a special version without the battlement.

3.22000 Castle Tower
total height 3.05 m
floor height 2.00 m

Play value

The tower is clad with timber facing made of natural larch, complete with observation slits. Inside are three floors, installed offset to one another. The top floor can be reached via a ladder or you can climb up to the level of the balcony and enjoy the panorama. Use the ladder installed there to reach the ground again. The balcony can also be used as a connection to other play equipment e.g. with a suspension bridge. In combination with a slide, the Look-Out Tower is an attractive eye-catcher.

3.21500 Look-Out Tower
total height 4.50 m
floor height 1.00/2.00/3.00 m

Play value

Because of its striking shape, the Pentagonal Tower is a real eye-catcher and is therefore well suited as a playground signal. It lends the site a very special, unmistakable character. The gaps in the cladding allow light to pass through and give children the opportunity to reach and experience heights. The installation of slides, e.g. a tunnel slide increases the exercise activity. Several towers can be combined using connection tunnels to create a small village.

This picture shows a special version, closed to a height of 1.40 m.

3.53000 Large Pentagonal Tower
total height 8.20 m
